Experience

Team Member

Rutherglen, Glasgow

KFC UK & IRELAND

2022 - 2024

- This was a person facing role which allowed me to develop fundamental skills of communication and coordination
- Working in a large semi-segmented team I would frequently manage and coordinate which allowed me to develop excellent team-working skills.
- I was also provided with valuable experience of business management and the back end of companies.

Electrical Team Lead

Strathclyde University

STRATHSEDS

2025-Present

This is a role in the student society StrathSEDS in which I lead the electrical team as we overcome engineering challenges.

- I have created a Flight computer.
- Successfully launched and recovered 2 rockets.
- I am leading a team to create a scientific experiment for this year's rocket's payload.

Volunteer Cleaner

Rutherglen, Glasgow

RE:VOLVE

2022-2022

This was a brief volunteering role that I completed as part of my Scout's gold award.

Projects

Firefly Ultra

✉ StrathSEDS-on-GitHub/firefly-firmware

ELECTRICAL DESIGNER

January 2025- June 2025

- Designed a flight computer for control of a rocket flight.
- Implemented many dissimilar sensors in order to gain accurate data during flight and allow for a further "sensor fusion" project.
- Routed the board using Altium designer then manufactured and tested the board using a vacuum chamber.

The Michael Site

✉ EPICSTYLE3/TheMichaelSite.github.io

SOFTWARE

November 2025- Present

- Created a website using HTML and CSS for an engineering portfolio.
- Hosted on GitHub pages.
- Used to develop my skills with version control and programming best practices.

Skills

Programming Languages C, Python, HTML + CSS

Spoken Languages English, German (Amateur)

Programs MS Office, MATLAB, Altium + KIKAD, GIT

Education

University of Strathclyde

City Centre, Glasgow

MENG ELECTRICAL AND MECHANICAL ENGINEERING

September 2024 - Present

- I have gained an understanding of electrical fundamentals in both analogue and digital domains.
- I have studied and researched dynamics and material statics.
- I have learned programming best practices which has allowed me to solve problems and complete various projects.
